And, worse than Fine Underwear, in all, it is a proliffo source of madness. To become unable to sleep soundly or even reasonably well is cause for serious alarm. The causes of insomnia are legion, but they clung for dear life. outside of general nervous debility and dertaking of no slight danger, but effort chronic disorder of the nervous system, whether caused from mental or nervous were promptly made, and before long disease, or from some injury to the the man who happened to be nearest the rescuer was reached. And this brave nervo centers, the causes of sleeplessness may be put down as anything that fellow, hanging there to the iron wink actually persuaded the rescuers to delay causes the blood to flow to the brain in taking him off before they saved by increased quantities. Strong physical exorcise, rapid breathing or deep thought will, according to the best sutherities, conduce to bring about a state of sleep-lessness. And tailess checked it will grow until it becomes very serious. It may be stated, as a fact overlooked

by many who find themselves unable to deep, that their insomnia arises from carclessness on their part in failing to observo certain easily ascertained rules in regard to sleeping.

The body cannot sleep while the brain is excited. Anything which will dimmish the flow of blood to the brain wil allay excitement. Very deep, slow and quiet respiration will scothe the brain to a great degree, and, at the same time, serve the purpose of detracting the attention of the mind from the matters which may disturb it.

Moderate heat, monotony of sound and darkness tend to make one sleepy. The only effect of durkness is to shat out external objects and thus assist in quieting the mind. The notion that sleep ob tained in the daytime is not beneficial has no reason to support it. Sleep is sleep, and it one can sleep soundly an I will in the day time it serves the same purposa as sleep obtained at night. But fow people can do this on accourt of the light and noise. Hence the old but erroneous idea that only sleep at night could theroughly rest and recuperate the body and mind after their labors. This is abundantly proven in the case of infants and convalescents. Both sleep in the day time equally as well as at night, and both grow more while sleeping than

Cool, fresh alr is the best to sleep in Extreme heat and closeness of the air tend to provent sleep, as does profuse perspiration. The teeth should be well cleaned and the mouth rinsed before going to sleep. After all these necessary rules have been observed, and still sleep efuses to come at the building of the pleading cyclids, one may be sure they are suffering from insomma, and should seek to induce sleep by any means. I was afflicted some three years with scalp disease. My hair was falling out and what remained turned gray. I was induced to try Ayer's Hair Vigor, and in a few weeks the disease in my scalp disappeared and my hair resumed its original color. (Rev.) S. S. Sins, Paster U. B. Charch, St. Bernice, Ind. Pastor U. B. Church, St. Bernice, Ind.

A few years ago f suffered the entire
loss of my hair from the effects of tetter.
I hoped that after a time nature would
repair the loss, but I waited in vain.
Many remedies were suggested, none,
howaver, with such proof of merit as
Ayee's flar Vigor, and I began to use it.
The result was all I could have desired.
A growth of hair soon came out all over
my head, and grew to be as soft and
heavy as I ever had, and of a natural
color, and firmly set."—J. H. Pratt,
